Stone Palatin's "First Immortal" saga continues with the second book in the trilogy, "Angel Blood." This new novel picks up at the same frenetic pace established in "Dark Angel," as a startling discovery plunges the reader headlong into a new adventure full of amazing escapes and magnificent battles. The action-packed tale of Enoch resumes with The Dark Lord attempting to uncover - and counterfeit - the secret of his fantastic powers. Meanwhile the Nephilim "triplets," Hades, Poseidon and Zeus, have become seemingly unstoppable in their bid to overthrow the powers that be with their tyrannical expansionism and horrific biological experiments. Belhah and Hera, the outcast wife of Cain, will both become possessed by evil spirits. Temptation and lust, power and greed - all affect the shifting relationships between the characters. A full cast of giants, saber-tooths, battle-unicorns, golems and prehistoric beasts - creatures the like of which have never before been seen - all contribute to the action-packed scenes that the reader has become accustomed to in Palatin's unique brand of story-telling.
