Alyssa Worthington is the daughter and sole heir to the most prestigious coven in the witch world. Her childhood has been spent in the mundane human world learning to blend in and hide who she truly is, and it is here, during her last year that she meets a striking ex-high school quarterback from a small town in Montana who will turn her world upside down. Alyssa holds the element of fire, unlike her best friends Lisa and Megan, who are both air elementals. It is the elemental powers that reside inside which require positive thoughts and positive actions in order to maintain this magickal connection. What would happen to a witch that let this get out of control? How can evil become the driving force behind revenge and death? Dark secrets, dark magick and a desperate desire for revenge will bring Alyssa to the brink of destruction.

She is being chased, but this pursuit is a silent one and her chaser has but one goal, Alyssa's complete and total destruction. Will she overcome this dark threat and begin to live out her destiny? Will she survive and if so, will she lose herself as part of the price for being alive? Or, will her destiny rest on being crescent bound?
