When you are the only one who sees the dark and terrible truth...

In a future Phoenix dotted by skyscrapers of steel and glass that spear the desert sky, Kinslee is born connected to all that floats in the Cloud of the Internet. She is Cloudborn. At sixteen, Kinslee is one of the few people alive who know what the AIs are hiding behind Internet walls. Kinslee's only chance to stay alive is to hide her Cloudborn identity from family and friends, and most especially, from the AIs who hunt the Cloudborn. But with Cloudborn disappearing, and the AIs watching through the eyes of all the people around Kinslee, it may only be a matter of time before they find her.
