The Moonsparrow Collection is comprised of a tapestry of Tall Tales, Myth and Magic. This compilation of tales is the best of Ms.

Wolfe's original published and unpublished Short Stories, and includes the stories that she has introduced at local public writing events and festivals. The subject matter ranges from: A woman who turns a small town on its ear, to: a Magical midnight concert in the woods. It is a light journey into a magical world when anything can happen, and usually does!
