Step outside...

Peter Tobey lives an idyllic existence of energy drinks, mind television sitcoms, phobia-induced hypersensitivity – and shopping. Into his world comes Kaleidoscope, a sinister, addictive sitcom that turns bright, happy shoppers into lethargic drones. Peter realises that he and his small group of friends must make the ultimate sacrifice: end Kaleidoscope, flee their beloved shopping centre, and be the first people in generations to step Outside into the great unknown...

Kaleidoscope is a pulsating blend of magical realism, dystopian fantasy adventure, satire, trash culture, science fiction, post-modern horror, and the childhood fever in which you and your family have been trapped for the last thirty years.
